Stephen is a speaker who is passionate about beef cattle with a lifetime of practical hands on experience and a message to share.

Now in its eighth year, the Northern Farming Conference aims to give farmers the opportunity to consider how best to progress and take control of their businesses over the next few years. Under the theme Taking Control, leading farmers and industry stakeholders from across the country will examine what the future may hold for farmers and their plans for this, particularly in light of the ongoing uncertainty around the terms of the Brexit deal.

Conference Chairman Andrew Robinson said:

☺☺ *We are now more than a year on from the Brexit vote and the level of uncertainty over the effects this could have on the farming and rural industry continue to grow. The conference gives a great opportunity to listen to the views of leading farmers and industry leaders on their opinions on how to steer a path through the uncertainty.* ☺☺
